About This Content

This Cosmetic DLC adds over 120 unique heads (over 60 per gender) to King Arthur's Gold.

Each head represents a flag of the world. There are also Jolly Roger and Rainbow/Pride flags.

Use them to celebrate your heritage and bring some colour onto the battlefield!

Title: King Arthur's Gold: Flags of the World Heads Pack
Genre: Action, Indie
Developer:
Transhuman Design
Release Date: 13 Jun, 2017

b4d347fde0

Minimum:

OS: Windows XP

Processor: 1.5 Ghz

Memory: 1 GB RAM

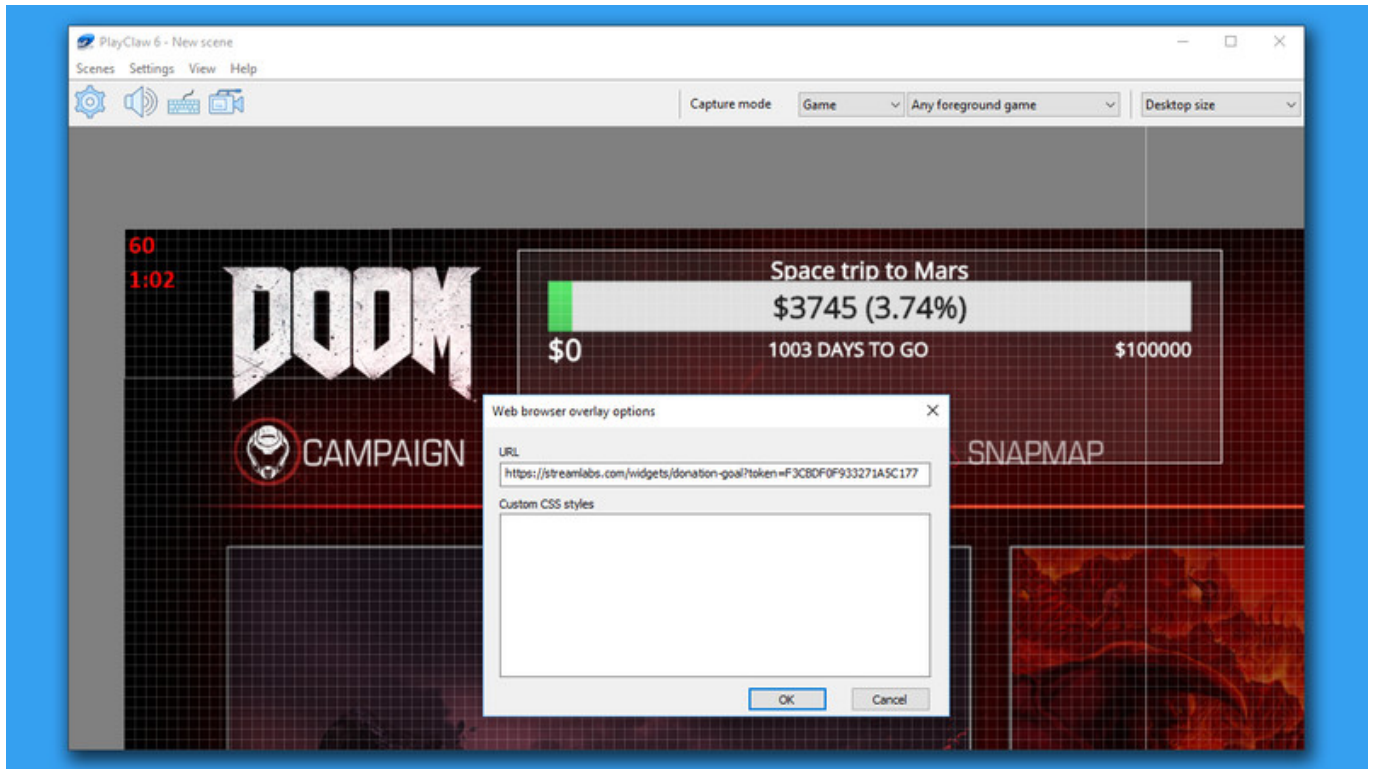

Graphics: 64MB Integrated

Network: Broadband Internet connection

Storage: 256 MB available space

English,French,Russian

Nice documentary on the early arcade and home game industry. Incomplete, but a full two hours of material and interviews with programmers of the day. If this is your sort of thing, it is probably worth the watch.. This game is an absolute nightmare to play. (Providing you get it to work).

I consider myself a very technically able person, however this took me 2 hours to get it working, after messing around with various settings and uninstalling the outdated junk that came with this. (I never managed to get the sound working, which was OK for me, I viewed a few video's and the sound was far too repetative).

I love puzzles games and I've played a wide variety of them.

However this game is just boring, repetative and the timing sections for this game are a nightmare. There's no quick save or check point system, so if you've got to go somewhere or you're busy, that's tough, and some levels do tend to go on for quite a bit.

There are 4 stages in the game with about 13 Main story levels and 6-7 bonus levels. So there's about 64 levels. If you manage to find enjoyment in this game, then you'll be sure to spend a long time on the game, which admittidly is good for those that do enjoy the game. However the DLC which is for 3 levels is a joke. Not to mention the game crashed a total of 22 times for me on the DLC levels, the rest of the game never crashed, so not sure what was going on there,

Whilst each stage is just a reskinned version of the previous stage, I'm fine with that and I find it understandable.

The story is pretty 'meh' but at least they tried.

If you love puzzles and have a high tolerance (I thought I did) then this game may be for you, but I'd recommend staying far away from this game.. Brilliant!!!!. one of my first VR experiences, it was very BLARPy maybe even too much so, still cool and worth checking out though.. One of the best Defense games i have ever played. Its a lot of fun to blowup Zombies. If you like TowerDefense you cant get wrong with this one.. Takes a little too long to stretch its wings with some alternate rules, but the puzzles are logical, stylish, and fun. Would recommend, and would encourage the devs to add some DLC puzzles that take additional advantage of the later rules. :). Fun game to play if you want to waste some time.

As an introduction to the simplified hack n' slash world of 4th ed D&D, it works. As anything else, it fails.. Great game if you're a fan of bullet hell games this is for you and it's super cheap. short boring advertisement but ok as a proof of concept which there are alot of already. It's a simple chill game. First Putt-Putt game I've played. Btw, for those who launch this game and it's all full screen with high mouse sensitivty. There's two options you can do to fix this, on your Library right click the game, go to local game files, and you'll see the ScumVM emulator, add the game onto there, and go to it's settings and put it to "Correct Aspect Ratio". This will solve your problem however you'll now be playing it on the emulator so Steam will not be counting your playtime hours. Other way is to do alt+enter when starting the game, the game will go into windowed mode, for me it was on the left side for some reason not showing the full image but on the bottom corners of the screen I was able to adjust the size and it was fine but it's not full screen.. A high-quality and undeniably moody orchestral score, at a perfectly reasonable price. No idea what's up with that cheesy pop ballad near the end, though.

Verdict: 9/10.

[Cheers!](#). Great game its really fun and time killer. Please add more missions coz i love it.. Excellent game with fun gameplay for a bargain price. Highly recommended.. People are rating this game bad because its quote "repetitive" when they should know its a beat em' up game. which I think is kind of unfair. because they know what they are getting into. on with my point I would strongly reccomemd this game because of how fun it is. Ive caught myself saying ok one more round then Im suddenly doing the next levelI have a lot of hours into this game. There was 2 things that annoyed me though. 1. A controller wont work. which I think is obserd for a beat em' up game. these type of games were meant to be played with a controller. 2. I have to constantly pause and stretch my hands because I keep spamming the attack button. The bottom line is this is a Great game I would strongly reccomend it for the unbeatable price.
